

Lateral Flow Non-Invasive Home Tests

Humaskan are at the cutting edge of developments to make early notification of potential medical anomalies identified through the application of easy to use home tests kits with immediate results.

Home tests are currently in development using Humaskan's patented technology which combines both Urine and Saliva sample collection for improved testing accuracy :

- Liver Cancer
- Ovarian Cancer
- Pancreatic Cancer
- Prostate Cancer
- Hormonal Imbalances (thyroid hormones, cortisol, etc.)
- Autoimmune markers (e.g., rheumatoid arthritis, lupus)
- Stress biomarkers
- Alzheimer's

As research continues additional tests for medical anomalies where suitable, will be added to the range of Humaskan home tests.
